

The first online clinical decision support tool that provides healthcare professionals with specific answers to more than 120,000 questions at the point of care.

**ClinicalAccess** is a one-of-a-kind clinical decision support tool specifically designed to reflect the way real-world healthcare professionals think at the point of care. This revolutionary new online resource is guided by one philosophy: Identify all questions that may arise in the hospital, clinic, or ambulatory care setting for any given disease state, and provide one concise answer to that question—using only the most trustworthy and vetted content.

## Spend more time doing what you do best.

Nowhere else will you find a targeted, authoritative answer as quickly as **ClinicalAccess** – helping physicians, residents, nurse practitioners, and physician assistants provide superior patient care while maintaining maximum speed and efficiency. **ClinicalAccess** delivers the single best answer to your clinical question – the moment it's needed. When every second counts, the less time you spend searching for answers, the more time you have to treat patients.

## Benefit from the leading experts in medicine.

Our Advisory Board of world-renowned experts has developed a highly comprehensive list of questions to assist in your patient decision-making throughout diagnosis and treatment. The result: more than 120,000 real-world questions covering 25 specialties. Included in the answer are related images, tables, and videos to aid in understanding the topic. Our team continuously reviews and updates the content to ensure that our information is current and accurate.

## Connect to authoritative content you can trust.

Powered by leading online clinical resources, **AccessMedicine**, **AccessPediatrics**, **AccessEmergency Medicine**, and **AccessSurgery** – **ClinicalAccess** delivers trusted, accurate information that is essential to effective patient care. We provide hand-selected, precise answers drawn from landmark references, such as:

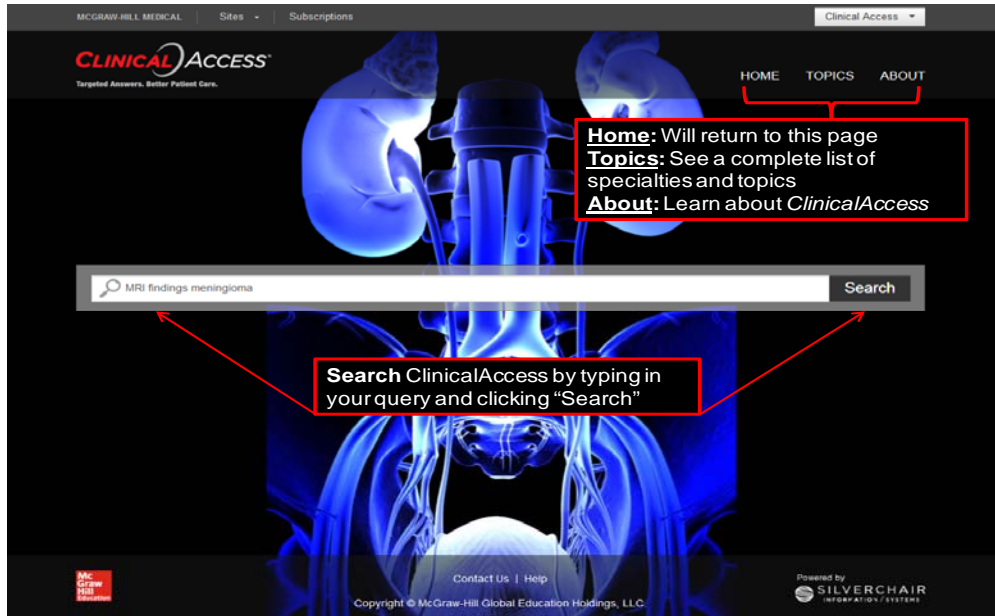

- *Harrison's Principles of Internal Medicine*
- *Schwartz's Principles of Surgery*
- *Tintinalli's Emergency Medicine*
- *Principles and Practice of Hospital Medicine*
- *CURRENT Medical Diagnosis & Treatment*

Because our content is written by the field's leading experts, **ClinicalAccess** shortens the time you need to evaluate information to determine whether it is appropriate for your patient or whether it has been successfully adopted into practice by other leading healthcare professionals. **ClinicalAccess** facilitates an effective and increasingly specialized search to meet the needs of all healthcare providers today.
